YDM4109

ASSA ABLOY

An ASSA ABLOY Group brand

The intelligent security is all in your finger.

Yale GATEMAN finally introduces an intelligent biometric lock named YDM4109. This new lock has three default credentials – fingerprint, PIN code, and mechanical key override. Its advanced fingerprint verification technology guarantees more secure and convenient life. YDM4109 also provide two access modes – Security and Normal. So not only as for the residential purpose, but also for the multi-user environment, YDM4109 comes to you as the best choice. Now, actualize your dreaming life with YDM4109.

Product Specification	
Type	Mortise lock
Fingerprint	Up to 20
PIN code	6-12 digits
Finish	Black
Mechanical key	2
Backset	60mm
Applicable door range	40-80mm

One-touch Fingerprint Verification Method (Easy Scan)

Easy Scan technology has been applied to conveniently read a fingerprint in one shot without the need to open or close the cover to enter a fingerprint.

Voice Guide Feature

As the voice guide is offered that lets you know the operation status and how to set each feature and mode for easier and more convenient use.

Smart Touchpad

To prevent the password from being exposed due to residual fingerprints after opening a door, a new technology has been adopted to complete the door opening process by touching the keypad with a palm after entering the password.

Anti-panic egress with Safe handle

For convenience and in case of emergency, the door is automatically unlocked whenever the inner lever handle is used. And also safe handle will protect from any break-in attempts.

Scramble code

You can add meaningless number prior to or after the right code when there is a chance of exposing it to others.

Alarm (Break-in / Damage)

80dB alarm goes off if anyone attempts to damage the lock or force the door open, or if the lock detects.

Security / Normal mode

For multi-user environment, YDM4109 can be turned to Security(Master) mode that the master can register and delete each user while Normal mode controls all the users at one time.

Operation status notification

Whenever any operation is made, the keypad informs you what is happened through different alignment of the numbers.

Low battery alarm and emergency power supply terminal

It warns in case of low battery with alarm and LED. When the batteries are completely discharged, you can easily supply emergency power to the lock with the standard 9V battery.
